Hernando

*** If you live in a mobile home, you MUST EVACUATE regardless of its location in Hernando County ***

A message from Hernando County Sheriff AI Nienhuis

Dear Residents,

The 2015 Atlantic Hurricane Season marked the tenth consecutive year that Florida did not experience a hurricane landfall event. As we know, it only takes one storm to make for a bad season for our residents, please do not become complacent with your preparedness planning. I urge you to prepare now, have a plan for your family, pets and/or business. The time to act is now; a good disaster supply kit will have you ready for any threat, natural, man-made or biological.

While my office believes in being prepared for all hazards, flooding remains Hernando County's primary threat, with significant flooding experienced throughout the region this past year. Please consider purchasing flood insurance to protect your investment. Through Hernando County's participation in the Community Rating System, residents may be eligible for up to a 25% discount. Flooding preparedness information can be found at www.floodsmart.gov.

Information to assist in developing your plan can be found in this Disaster Planning Guide, or on the web at www.hernandosheriff.org/em or www.ready.gov. Additionally, the Emergency Management staff will be happy to assist you with any questions that you may have.

It is our hope that we continue to enjoy all the natural beauty Hernando County has to offer in a safe, prepared manner.

Sincerely,

 AI Nienhuis
 Sheriff

PO. BOX 10070 - BROOKSVILLE, FL 34603-0070 FAX 352 796-0493 PHONE 352 754-6830

USING YOUR COUNTY MAP

- Locate where you live and work on the map.
- Determine whether you are in an evacuation area, and if so, what level (color).
- If you are in an evacuation area, or live in a mobile home/RV, decide where you will go if ordered to evacuate. Your choices include:
 - Home of a relative or friend outside the evacuation zone
 - Hotel/motel outside the evacuation zone (make arrangements early)
 - Go to a public shelter
 - As a last resort leave the area entirely
- If you must go to a public shelter, use your county map to decide which one is convenient. Make sure you verify the shelter is open before you go.

HURRICANE THREAT

- The colored areas on the map are vulnerable to storm surge. Storm surge is produced by water being pushed towards the shore by the force of the winds moving around the storm.
 - Storm surge creates a path of destruction, wiping out structures as it rapidly surges inland and then recedes. This is a life threatening situation for anyone who ignores mandatory evacuation orders and stays in vulnerable areas.
 - Hurricanes are categorized on a scale of 1 to 5, depending on wind strength and destructive power. The evacuation zones are color coded to designate the level of storm surge likely to occur.
 - If you live in an area ordered to evacuate, gather your family/pets and emergency supplies, secure your home and leave immediately. Failure to obey a mandatory evacuation order is a violation of state and local laws.
- Note: All persons living in mobile homes/RVs must evacuate for all mandatory evacuation orders, regardless of where you are located in the county.
